LOCATION
Lagos, Nigeria · GMT+1

STACK

Languages & Frameworks

JavaScript · TypeScript · React · React Native · Next.js · Flutter

State & Data

TanStack Query · Zustand · SWR · Axios · Socket.IO · Firebase · REST APIs

UI & Styling

Tailwind CSS · shadcn/ui · Responsive Design · Data Visualization

Product Expertise

Cross-platform Mobile · Real-time Updates · Payment Integration · Push Notifications · Analytics

EDUCATION

B.Tech, Computer Science & Engineering

Ladoke Akintola University of Technology, Nigeria

2018 — 2024

PROFILE

Software engineer shipping fast, cross-platform products across web, iOS and Android. I architect fintech ecosystems, telemedicine dashboards and startup platforms where real-time data, secure payments and polished UI meet — with a focus on smart caching, native-feel performance and interfaces that hold up in production.

EXPERIENCE

AUG 2025 — PRESENT

FINTECH

Auto-Clea · Frontend & Mobile Engineer

- Architected a cross-platform fintech ecosystem — Next.js web app, React Native mobile app and an admin dashboard connecting businesses with vendors for optimized currency exchange rates.
- Engineered a high-performance, mobile-responsive admin dashboard with Next.js, shadcn/ui and Tailwind CSS, significantly reducing task completion times.
- Optimized data caching across web and mobile with TanStack Query and SWR, minimizing API overhead and improving platform responsiveness.

APR 2025 — DEC 2025

STARTUPS

Kloza · Lead Mobile Developer

- Led development of Africa's premier collaboration platform connecting early-stage startups to vetted service providers.
- Built a cross-platform React Native app optimized for iOS and Android with a consistent, high-performance experience.
- Implemented secure, tokenized API communication with Axios and SWR for fast-loading screens and instant updates.

APR 2025 — JUN 2025

HEALTH

Telemedia · Web Developer — Admin Dashboard

- Built a feature-rich admin platform for a telemedicine ecosystem serving doctors, patients and pharmacy services, using Next.js 13 and TypeScript.
- Shipped advanced patient and doctor management with multi-criteria filtering, pagination and search, plus calendar-based scheduling and real-time Recharts analytics.
- Hardened production reliability with robust loading states and error boundaries.

JAN 2025 — MAY 2025

PROPTech

SmartHood360 · Flutter Developer

- Delivered a modern estate management platform improving communication between residents and management teams.
- Implemented amenity booking, security incident tracking and community announcements, collaborating with backend developers on API design.

EXPERIENCE (CONTINUED)

OCT 2024 - FEB 2025

FOOD

FesPris Kitchen · Mobile Developer

- Created a feature-rich restaurant ordering app that improved order processing and customer retention.
- Integrated SWR for real-time order tracking while reducing redundant API calls, and crafted an intuitive menu-to-checkout journey.

AUG 2024 - SEP 2024

E-COMMERCE

Darads · Mobile Developer

- Developed an e-commerce mobile app with secure, frictionless payment flows, including reliable wallet top-up and payment processing.
- Collaborated closely with backend engineers on API-to-UI integration, reducing post-launch bugs.

JUL 2022 - SEP 2022

FOOD

Munch (UK) · Web Developer

- Built a real-time restaurant admin dashboard enabling managers to run operations with precision.
- Integrated Socket.IO for instant updates on orders, driver assignments and delivery status, with powerful menu and order management tools.

FEATURED PROJECT

Doctor Appointment System

FULL-STACK · REACT · NODE.JS · MONGODB · SOCKET.IO · FIREBASE

A real-time, full-featured appointment scheduling system streamlining healthcare access — patients book, reschedule and cancel in seconds; doctors manage schedules and patient histories; admins oversee the platform from a single control hub.

- Real-time notifications for confirmations and reminders, reducing missed appointments.
- RESTful API with Node.js and Express; fast, reliable MongoDB storage; admin analytics and reporting.

Let's build something fast.
